Introduction

Google Workspace Endpoint Management is Google's solution for managing and securing Android and iOS devices.

Purpose

This document provides a step-by-step guide for configuring mobile devices using Google Workspace. This guide covers the essential setup steps for enrolling Android and iOS devices and installing of relevant apps.

Pre-Requisites:

- Android OS version 10.0 or above
- iOS version 15.0 or above
- Register for Multifactor Authentication (MFA) using this link: https://getit.ril.com/GETITDocs/DOC/ITSOP/Google_Workspace_MFA.pdf

Note:

- Check iOS version details in the Security →System →About
- Check Android version details in Settings → About Device
- Refer to the below mentioned link for MFA registration

Android Devices

Unenroll your Android device from Intelligent HUB (AirWatch) app:

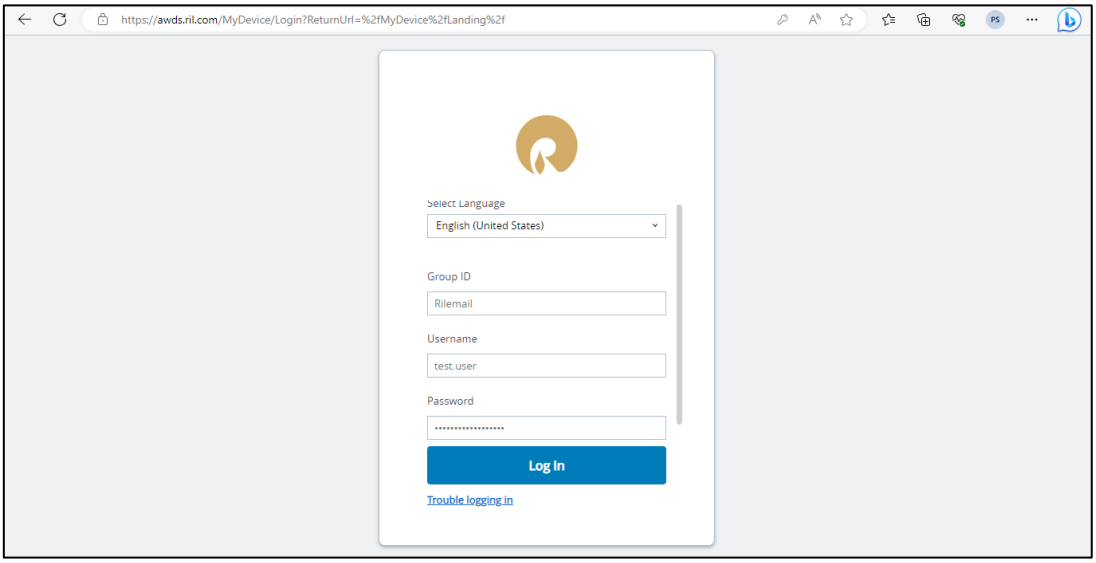
If Intelligent HUB app is not installed on your device, you can directly proceed with the steps to configure Google workspace on your device as per steps mentioned in **Page No. 6**

Step 1: Open the Self-Service portal in your browser and Delete device.

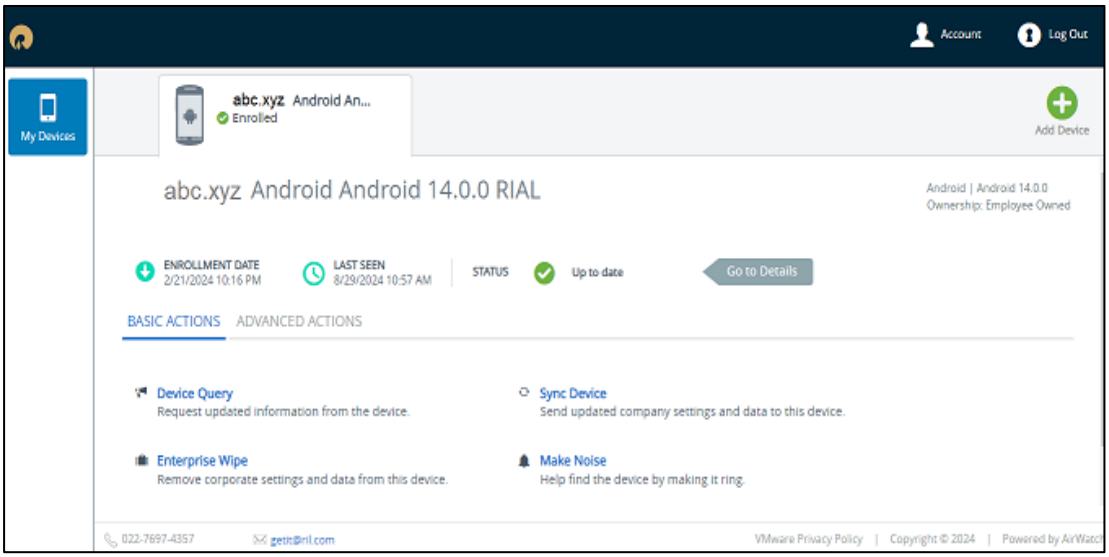
Self-Service Portal Link: https://awds.ril.com/mydevice

Step 2: Enter the details mentioned below:

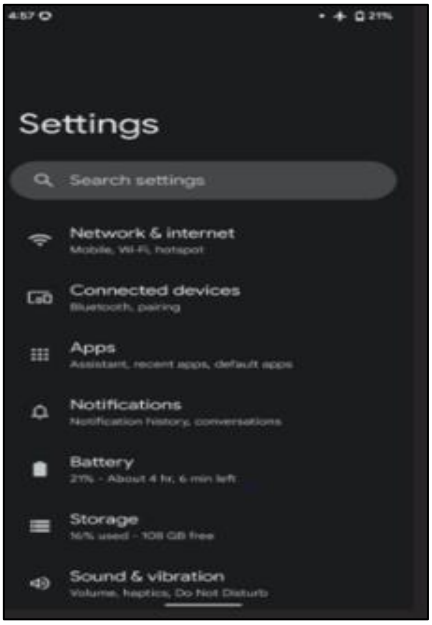
Group ID – Kindly enter "**RILEMAIL**" or "**RIL**"
Username – Domain ID
Password – Domain Password

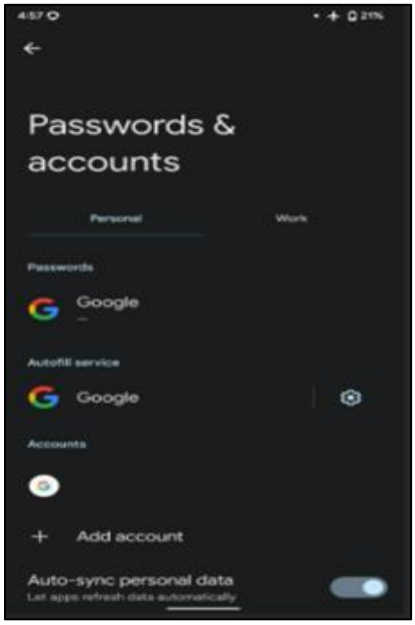


Step 3: Select the device to be deleted and click on Delete Device.

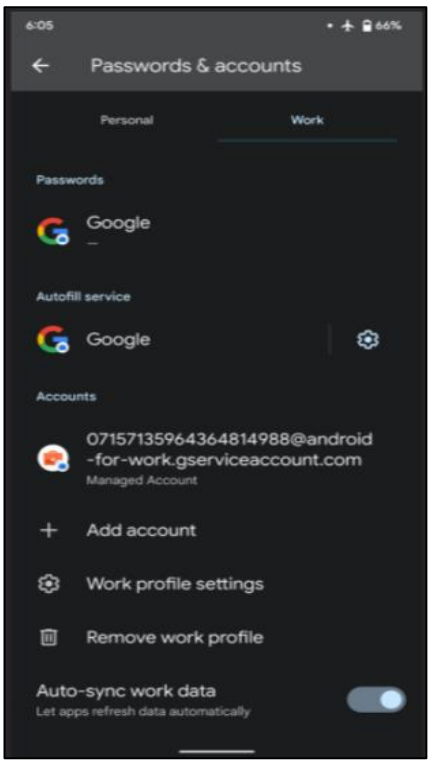


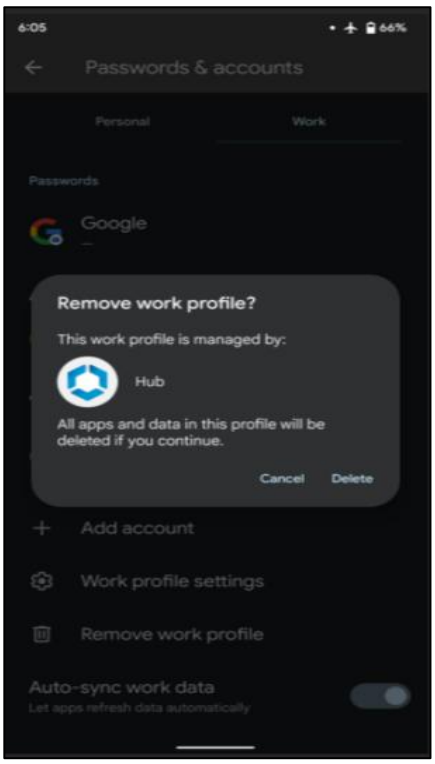
Step 4: After device deletion, check in the device settings whether work profile is deleted completely from the device.





Step 5: Select Remove work Profile and Delete work Profile.

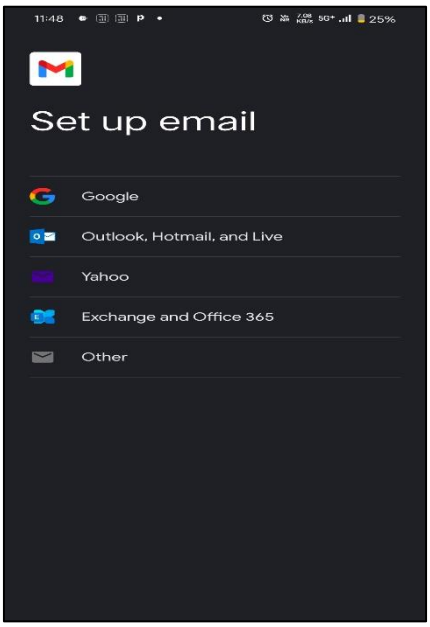


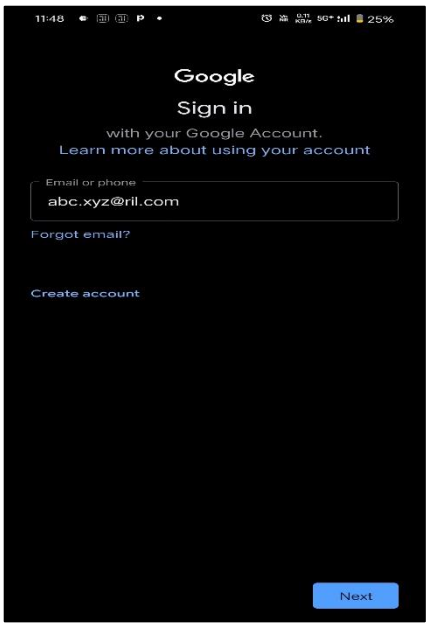


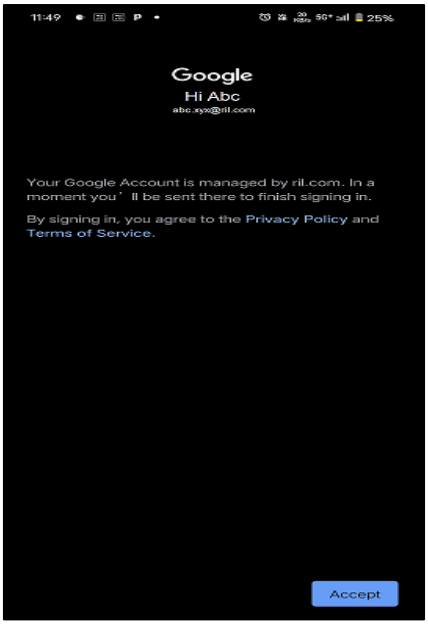
Now you can Configure your device in Google Workspace.

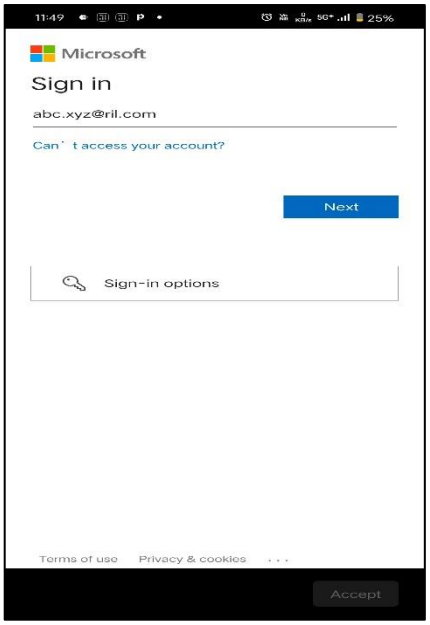
Steps for enrolling your Android device to Google Workspace

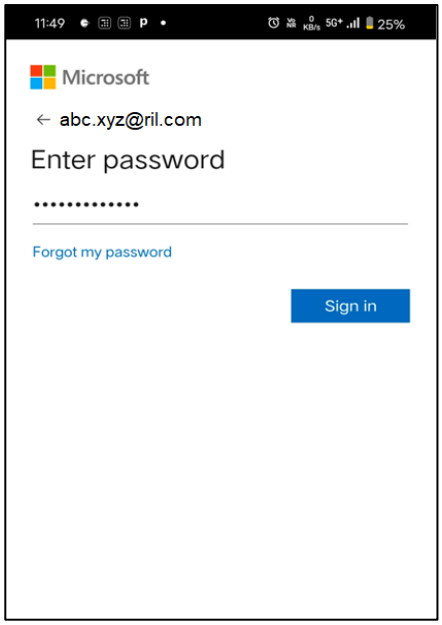
Step 1: Open the Gmail application and add a new account. Select Google >> Enter Email Address and Password.



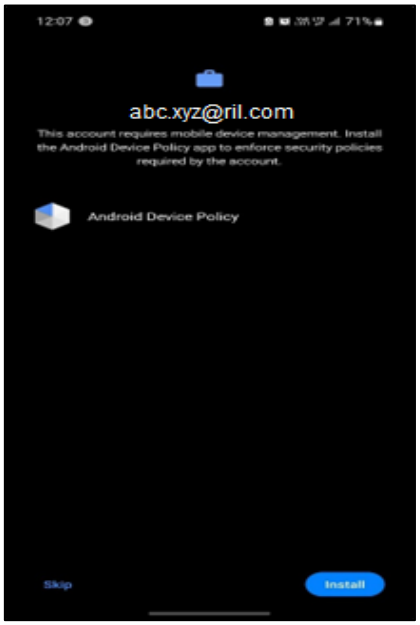


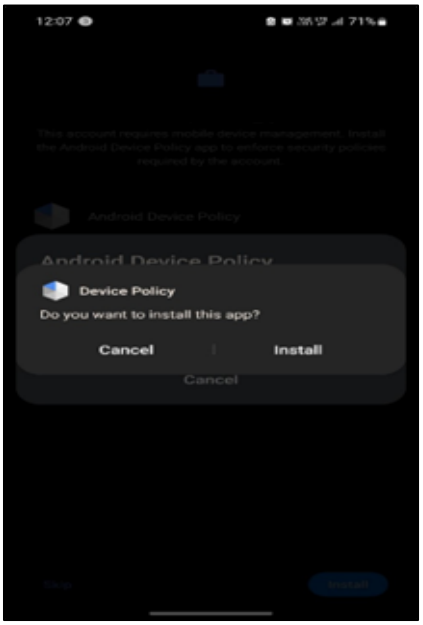




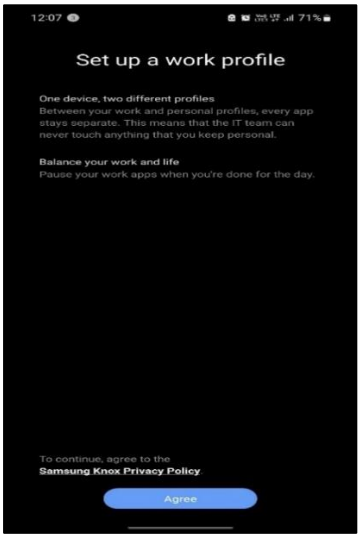


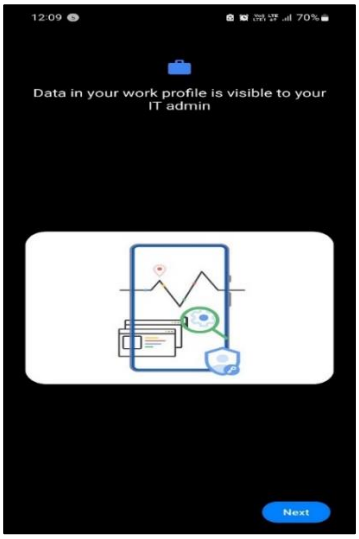
Step 2: Install Android Device Policy App.

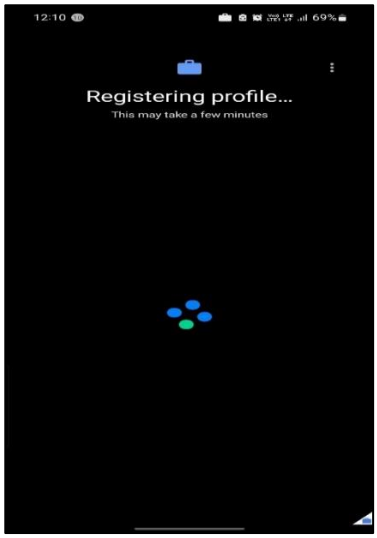




Step 3: Setup Work Profile.

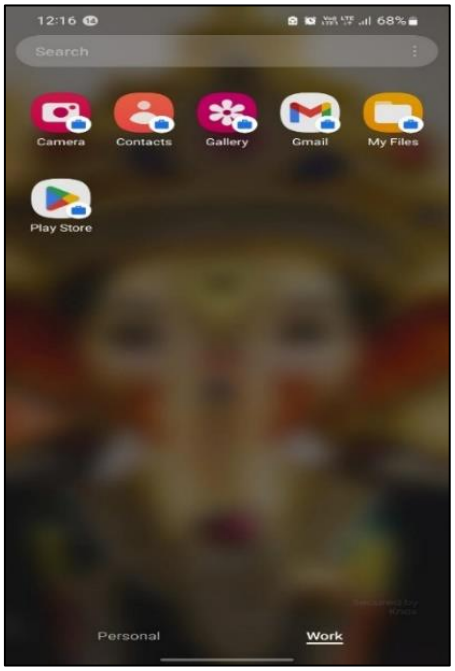




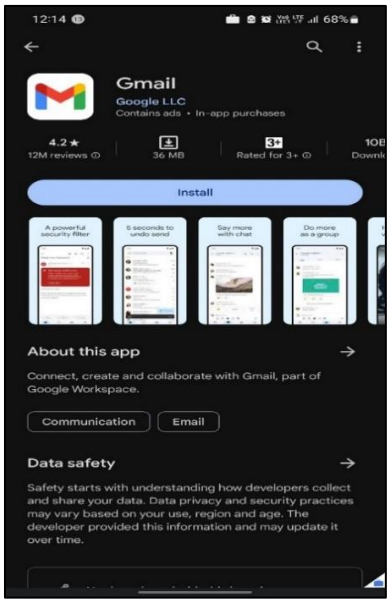


Step 4: Once the Google Device Policy app is configured; go to your mobile home screen you will find app icons with badges in the app drawer. You can differentiate personal apps and work apps as seen in the below images.

Step 5: The apps with badge icons are official apps and others will be personal ones.



Step 6: Install required applications like Gmail, Google Sheets, Google Docs etc. from the Managed Play Store in your android device Work Profile.



iOS Devices

Unenroll your iOS device from Intelligent HUB (AirWatch)

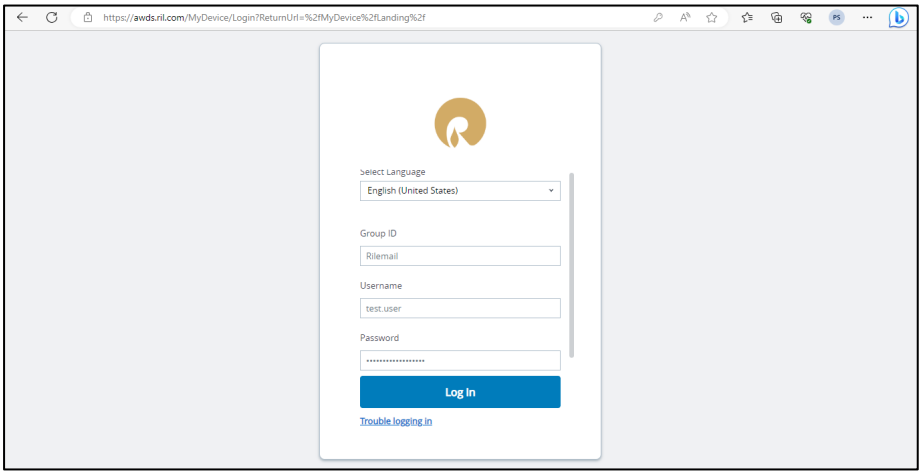
If Intelligent HUB app is not installed on your device, you can directly proceed with the steps to configure Google workspace on your device as per steps mentioned in **Page No. 13**

Step 1: Open the Self-Service portal in your browser and Delete device.

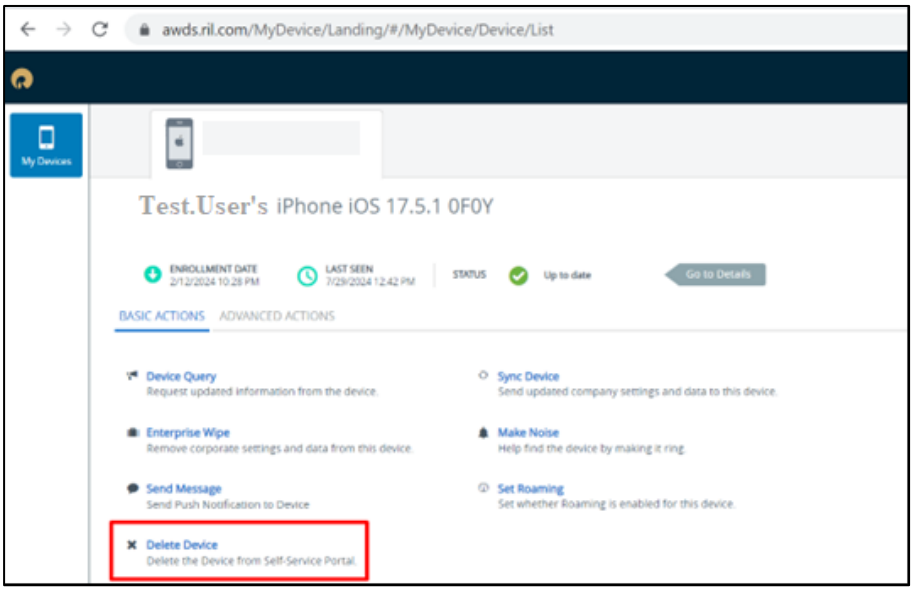
Self-Service Portal Link: https://awds.ril.com/mydevice

Step 2: Enter the details mentioned below:

Group ID – Kindly enter "**RILEMAIL**" or "**RIL**"
Username – Domain ID
Password – Domain Password

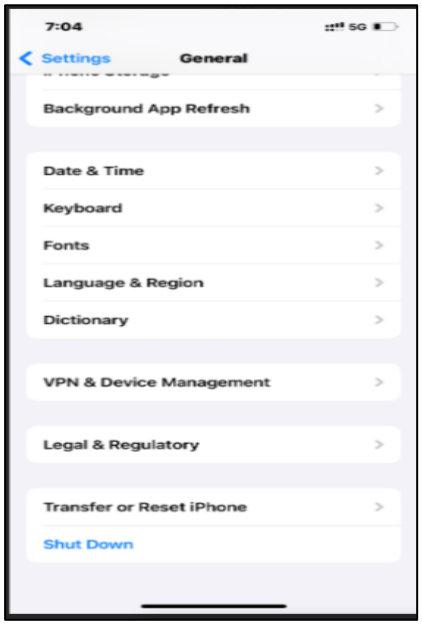


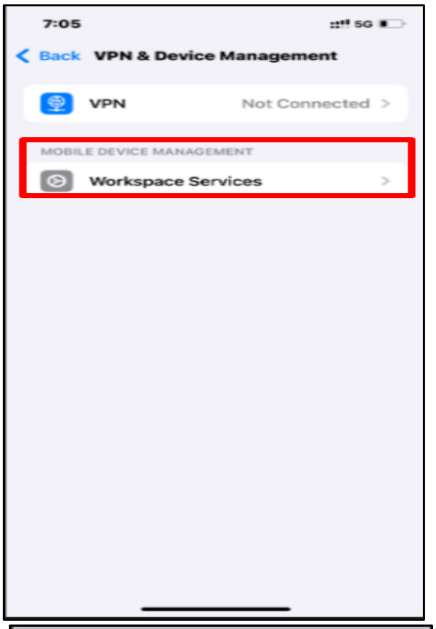
Step 3: Select the device to be deleted and click on Delete Device.

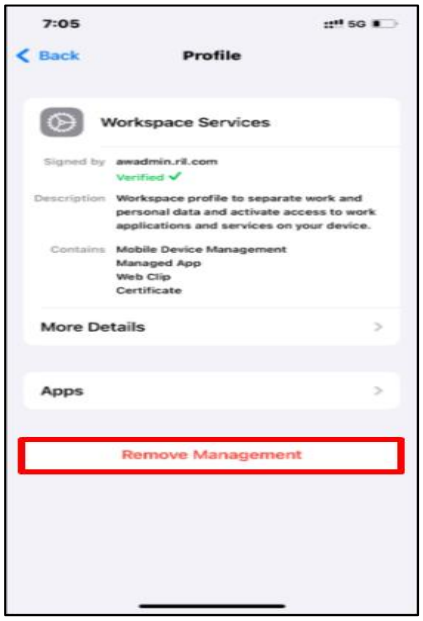


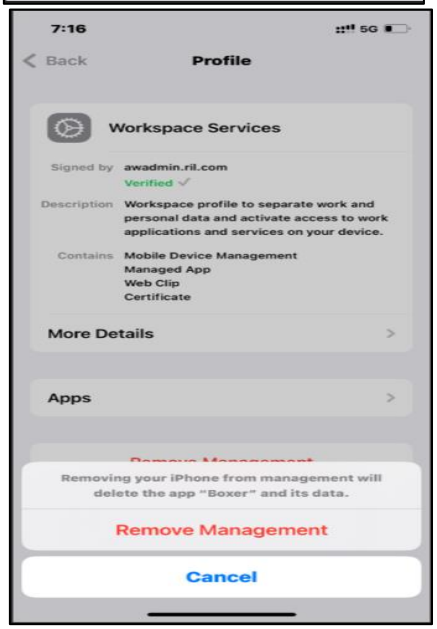
Step 4: After deletion of the device check in the device settings whether the work profile is deleted completely from the device.

Step 5: Open device settings >> Click on General option >> Select VPN and Device Management >> If Workspace services profile exists >> Select Remove Management >> Enter device Passcode >> Select Remove Management.





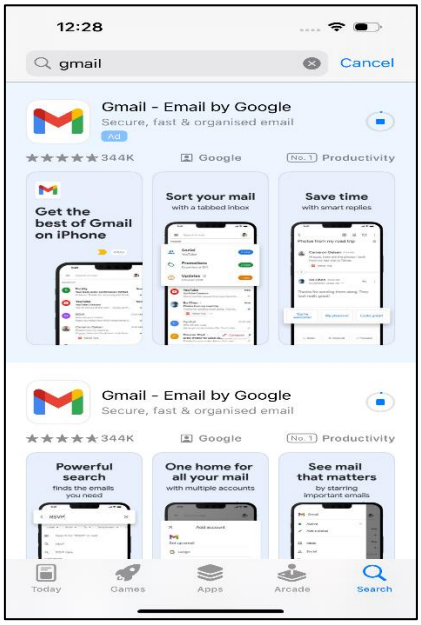




Now you can Configure your device in Google Workspace.

Steps for enrolling your iOS device to Google Workspace

Step 1: Download the Gmail application from app store.



Step 2: Add your official Google Workspace Account in the Gmail app. Follow the below screenshots for adding account.
