Ways to Increase Laptop Battery Life

Using below tips you can extend Laptop Battery Life

Power management

Shut down / Hibernate the laptop instead of Sleep when ever possible.

Switch off the Wi-fi if you do not plan to access your network or Internet connection.

The environment

Avoid extreme temperatures. Charge and use the battery at room temperatures.

Avoid supporting your laptop on a pillow, blanket, or other soft surface that can heat up.

Peripherals

Unplug external devices such as a USB mouse or an external drive.

Eject external devices [like pen drives, hard disks] when not in use.

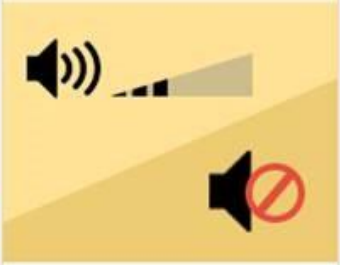
Reduce the number of open Windows

Close applications which are **not required** at a given time.

Display

Reduce the screen's brightness level.

Sound



Turn the volume level **down, or mute** it, if not in use.

Battery itself

Don't leave your laptop on **permanent charge,** it will affect the battery life.
